Import Data Using Transform Maps in Sheets

Customer Problem Statement Template

The problem statement focuses on the difficulties faced by users while importing data from Sheets into the system. It helps the team understand the user's needs and identify the problems that should be solved through the project.

The main purpose of this project is to make the data import process easier, faster and more accurate by using Transform Maps. It reduces manual data entry and helps users map the source data to the correct target fields.

Problem Statement

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A user who needs to import data	Import data from Sheets into the system	Manual data entry takes more time	A large amount of data has to be entered one by one	Tired and frustrated
PS-2	A data administrator	Transfer data from Sheets to the required tables	Data may be entered into the wrong fields	The source and target fields may have different names or formats	Confused about the data

PS-3	A system user	Import a large dataset quickly	Errors and duplicate records may occur	The data may contain missing or repeated information	Worried about data accuracy
PS-4	A data management user	Map spreadsheet fields correctly	It is difficult to match every field manually	Different field names and formats can make mapping difficult	Confused and time-consuming
PS-5	A user managing records	Validate the imported data	Incorrect or incomplete data may be imported	The source sheet may contain missing or invalid values	Concerned about incorrect records
PS-6	A beginner user	Use the data import process easily	The transformation process may seem complicated	Proper field mapping and transformation rules are required	Difficult to understand the process
PS-7	A system administrator	Avoid duplicate records during import	Duplicate data can be created	Existing records may not be identified properly	Worried about data consistency
PS-8	A user importing data regularly	Reduce the time required for data entry	Repeated manual work takes a lot of time	Data has to be processed and entered repeatedly	Frustrated and less productive

Selected Main Problem Statement

PS-1:

I am a user who needs to import data, I'm trying to import data from Sheets into the system, but manual data entry takes more time because a large amount of data has to be entered one by one, which makes me feel tired and frustrated.

PS-2:

I am a data administrator, I'm trying to transfer data from Sheets to the required tables, but data may be entered into the wrong fields because the source and target

fields may have different names or formats, which makes me feel confused about the data.
